Avg Monthly Charges by Churn Status

Key Retention Recommendations:

1. Target month-to-month customers with contract upgrade offers and loyalty incentives.
2. Strengthen onboarding and engagement programs for new customers, as lower-tenure customers are more likely to churn.
3. Monitor customers with higher monthly charges and provide personalized retention offers.
4. Investigate churn patterns among electronic check users and encourage automatic payment methods.
5. Prioritize retention campaigns for high-risk customer segments identified by the churn prediction model.
